Additional Information

This course will not meet every week. The tentative schedule of meetings is below; any changes will be communicated through Blackboard.

Your attendance and participation are crucial to the success of this course in developing an intellectual community for Honours students. Please commit to attending all scheduled classes.

Course Description

This course is designed to enrich students' Honours experience by providing a common forum for discussing the research process. We will look at some previous years' Honours theses in depth, focusing on the research methods used and the various ways in which information can be presented. Students will also present progress reports on their work and discuss the strategies they are using. This course is designed to facilitate, not to interfere with, the research process as guided by your supervisor. As this is an interdisciplinary group, there may be a great deal of flexibility in academic approach. We will examine a range of research methods and presentation styles. The one that is best for you is the one that you agree on with your supervisor. In case of any conflict with the advice you receive in this course and the advice your supervisor gives you, your supervisor is "the boss."

Objectives of the Course

This course is designed to help students acquire deep research skills and to foster a sense of cohort among Honours students in Communications Studies, Development Studies, Film Studies, and Law and Society.

Textbooks and Readings:

There is no textbook. Selected readings will be posted on Blackboard.

Assignments and Evaluation

There are no formal graded assignments for this course. Your thesis itself, graded by your supervisor, is the only formal assignment. However, you are expected to be prepared for the activities listed on the schedule of activities (below).

Freedom of Information and Protection of Privacy Act

This course is conducted in accordance with the Freedom of Information and Protection of Privacy Act (FOIP). As one consequence, **students should identify themselves on all written work by using their ID number. Also you will be required to provide a piece of picture identification in order to pick up an assignment or look at a final exam.**

Ethics

Whenever you perform research with human participants (i.e. surveys, interviews, observation) as part of your university studies, you are responsible for following university research ethics guidelines. Your supervisor must review and approve of your research plans and supervise your research. For more information about your research ethics responsibilities, see

The Department of Communication and Culture Research Ethics site:

Plagiarism

Using any source whatsoever without clearly documenting it is a serious academic offense. Consequences include failure on the assignment, failure in the course and

possibly suspension or expulsion from the university.

You must document not only direct quotations but also paraphrases and ideas where they appear in your text. A reference list at the end is insufficient by itself. Readers must be able to tell exactly where your words and ideas end and other people's words and ideas begin. This includes assignments submitted in non-traditional formats such as Web pages or visual media, and material taken from such sources.

Please consult your instructor if you have any questions regarding how to document sources.

Internet and electronic communication device information

Laptops are permitted for note taking only. iPods, cell phones and gaming devices should be turned off during class. Laptops may not be open during video screenings or during other students' presentations. Please respect your fellow students and your instructor by avoiding distracting uses of technology.
